WHOLE NO. 1983.

From the Auburn Advertiser.

The great old Democratic party, that for nearly forty years held almost undisputed sway in this country, has, for the past fifteen years, gone from bad to worse very fast. It is within the memory of the youngest citizen how it received its first great shock upon the rock of human slavery. It had withstood the gravest questions, both of foreign and internal policy, had met the questions of national banks and of tariffs with its strength nubroken. It was only when it engrafted human slavery upon its platforms of prinsecretly from the city, leaving the Lion House in a close carriage at eleven o'clock at night, and he was in attendance upon human slavery upon its platforms of prin- general muster of the Nauvo Legion at ciples that rapid and sure decay set in. ciples that rapid and sure decay set in.

Following as a natural sequence upon this was its opposition to the war for the Union, its sympathy with rebellion. How it withstood the blows that this accursed policy brought upon it must ever remain a marvel to the student of our national politics. Its old and thorough organization, however, carried it through with still some signs of life, and we emerged from the sebellion victorious, with an op-ly a carrilly selented assortiment of the chiral assortiment of the Church—and from the sebellion victorious, with an op-ly a carrilly selented assortiment of the church—and from the sebellion victorious, with an op-ly a carrilly selented assortiment of still some signs of life, and we emerged to fame in the annals of the Unuron—and from the rebellion victorious, with an opposition party sufficiently strong to wives from his harem, in whose society he threaten seriously the total loss of every doubtless hopes to find solace and support fruit of victory. But the nation rallied for his self-imposed exile. The party and the victory was saved with all its travel in five spring wagons, and are suppared results.

the Democracy, a sort of flank movement, that threatened not only the Republican party, but the republic itself. By a species of fraud unheard of in our history the Empire State was lost to the Democracy. Although a large majority of the legal votes were cast for John A. Griswold, John T. Hoffman was certified into detachment of cavalry from the Nauvoc Legion, well armed and mounted, and can only be retaken, if at all, by a strong party, but the republic itself. By a species of fraud unheard of in our history the Empire State was lost to the Democracy. Although a large majority of the legal votes were cast for John A. Griswold, John T. Hoffman was certified into office. A Democratic Logislature was also counted in, and there was no opportunity to investigate. Things assumed a subjects. His destination is, they say, St. George, a flourishing Mormon esttlements to the very foundations of our republican ment in the extreme southwestern corner to the very foundations of our republican institutions. Was this a republic of the nineteenth century? Had the last experiment of republicanism failed? Having successfully passed the greatest and most trying civil war any nation evar saw were we to be destroyed through a corruption of our own peculiar metitutions?

We hardly need recell our history since. How these very men, who get

We hardly need recall our history prophet's movements. Heretofore every lace. How these very men, who got journey which he has undertaken uto office by fraud, did not scraple to to any portion of the territory has teal everything that came in their way I since. How these very men, who got into thice by fraud, did not scruple to ateal everything that came in their way I ateal everything that came in their way!
How all the avenues of government were corrupted; how the plot thickened; how they perpetuated their power by an open purchase of voters with the people's money; how the organization extended, until the great Empire State seemed hopeleasly bound over to the rachems of Tammany Hall; and their threats to purchase the nation at the next Presidential election, seemed too likely of fulfillment. These things are too well known. Nor is it necessary to recall the downfall of all this injuity. The timely exposure of the thefts of the timely exposure of the Democratic thefts in the state; the great awakening of the people; the glorious victory of Nov. 7th, when the people in their majesty arose as one man and broke the chains by which they had been bound.

But what will become of the Democratic lend much probability to the theory of and his movements have been chronicled with as much minuteness as the doings of with as much minuteness as the doing with as much minuteness as the townth has appeared cither in the royal family in the court journal. The New York Herald of Monday saye:

A Newark local paper of Thursday evening last announced in a few brief words the death of "Zin Sing, I to of Canton, China," at Bolleville, New Jersey, of pneumonia, in the twientieth year of his age.

This announcement was made at noon of the same day to the two hondred Cales.

At two o'clock in the afternoon the coffin was placed on a wagon (a hearse being objected to,) and a long procession followed. First came 150 Chinamen, dressed in their national costume, walkdressed in their national costume, walking silently two by two; after them followed the women remployed in the laundry,
then Captain Hervey, his family and the
reporters in carriages. The cortege moved
on until a nearly enclosed plot was reached, specially donated by Captain Hervey
for the purpose. Here the mourners form-

one man and broke the chains by which they had been bound.

But what will become of the Democratic party new? It has time and again betrayed the trusts of the people. It has under its banners the great part of all the bad elements of the country. It is Democratic only in name. It has leet the confidence of the people the country over. What will become of it? It can make no show in the Presidential race of next year. Grant's re-election will be more unanimous than the re-election of Lincoln. Distrusted, disorganized, what chance is there for it but to break up, and try some new task. Every party in power needs a good vigorous opposition party, and we hope that what there is left of Democracy will farnish a respectable opposition to the Republican party. But we ware our Democratic friends, that to do this they must reorganize; they must throw saide their political hereey, and first of all, instil a little honesty into their leaders. In this way alone can they hope to prove of any service to the country.

AROUND THE GRAVES,

This announcement was made at noon of the same day to the two hundred Celestials employed by Captain Hervey at the Belleville steam laundry, while they were employed with their chopeticks in disposing of a very substantial dinner at their comfortable barracks. The intelligence, though not unexpected, for Zin Sing had been ill for some time, created a profound sensation. The sticks were dropped and the teacupe neglected. With heavy hearts they all withdrew and wept in silence, for it was the first death that had occurred in The Programme Colory.

The Farming Interest Around Thusville

The farming interest around Titusville is scarcely secondary to any other, and no hold ourselves responsible for the sentiments utefforts should be spared to foster and develop it. Our city offers one of the best with the views of our correspondents. All we markets for all kinds of agricultural pro. ask is candar, courtesy, brevity, and that all con-drope of any torse that are the conduce of any town that can be named or mentioned. That Titusville is growing with great rapidity our census and our building statistics demonstrate. That the accession to our population is of the best kind; of mechanics earning good wages, at steady employment, and of oil producers and oil men, who way of marketing alone, is really worth a thought and a practical effort. It is to b hoped that another season will not be passed without the establishment of pub lic markets and market days in Titueville, that the consumer may buy and 'deal directly and at first hands with the prodover. Are the farmers of this section prepared to respond to such a movement, and to supply our market? We doubt a our farmers are fully alive to the harvest with a more thorough cultivation of lands of particular kinds of produce or

crops. To say nothing about the resident population, four or five of our large hotels are full of guests nearly the year round, five or six first-class livery stables are in profitable operation. It may or may not pay the farmers of Eastern Crawford to raise wheat, corn or beef for this market: they may be more cheaply brought from THE HOSPITAL FUND ENTHETAIN- the surrounding country or the west; but called out a good many last evening. How many thousand and thousands of dollars are paid out by the consumers of Titusville in the article of vegetables, or fruits, cta., which never find their way to the pockets of producers, but which go to pay for stackhandling, moving, and transporting in various ways before it reaches its destination, all this without adding to the profit of the producer, increases the burden of funding a part of the money, which he waked up to the facilities they have for making money off their lands, or if they have they do not set about it. OF SPECIAL INTEREST TO CONSUMERS OF

Flannels, Blankets, Bleached and Brown Sheetings and Shirtings, Prints, the lively appreciation bestowed upon these concerts undoubtedly attracted the Ginghams, Table Linens, Towels, Napkins, Toilet Quilts, Water-Proof Cloakings, Cloths and Cassimeres, Ladies', Gent's, Misses' and Children's Furs. Merino and All Wool Hosiery, Shawls, Cloaks, etc.

> Within the past two weeks my Resident Buyer in New York purchased at Auc. tion and at Private Sale an immense line of the above named Goods, at prices averaging fully 33 1-3 per cent. less than the cost of production. This he was enabled to do from the fact of purchasing in large quantities, and in lots to close at a season of the year when manufacturers and wholesale dealers are anxious to reduce stock. A close inspection of the prices herewith submitted will reveal the fact to the reader that I propose to offer many styles of desirable Fabrics at less rates than those named for like qualities since that great year of panic and depression -viz: 1861.

THIS MORNING I WILL OFFER

My resident buyer purchased in New York recently over one hundred pieces of Black and Colored Vetveteens at a great Peremptory Auction asie, at about 25 per ceut, jess than the actual cost of importation. Consupers will do well to bear this fact in mind when they get ready to purchase. A saving of 90c to \$1 00 per yard is certainly worth looking after, and will doubtless insure a speedy sale for the eatire purchase. Don't delay purchaseing, for you may be disappointed in not finding the goods in stock when you want them.

Not withat a ling the fact that Alpacas have advanced greatly in price in the English and French markets, I will continue to offer the celebrated Panther Brand of Black Alpacas and Pors Mohin Brillianthur, for which I am sole agent for the sale of in this county, at the same price as those current last censon. This I am enabled to do from the fact of having made large purchases there the manufacturer advanced his rates. For the information of the public I herealth submit my price last for these justly celebrated goods, viz:

Don't fail to look at the Panther Brand of Black Aipaca when you have occasion to purchase. A person having purchased them once will have no other kind.

IN MY FUR DEPARTMENT

I will offer this morning a magnificent collection of Furs adapted to Ladier'. Misses'.

Russian and Hudson Bay Sable, Mink, Seal, Ermine, Black Martin, White Fox, Astrachan, River Mink, Naturai Rat and French Coney.

All of which were made up for a strictly first-class trade, and were purchased during the warm weather early in October, at a time when dealers were anxious to bell. The rates at which I purchased them enables me to offer greater inducement to purchasers than can be obtained elsewhere. All who have this description of Furs to buy are respectfully requested to call and examine my assortment.

Valuable Invention

For Oil Wells.

CATES' PATENT BACK SUCTION PREVENTIVE

Which entirely prevents the in-

aress of air into oil wells while the tubing is being drawn.

It is a well-known fact to oil well operators that upon wells where gas pumps are used, it is necessary to preserve as nearly a perfect varuum as possible, and that no are shou do be let into the well at any time when it can possibly be avoided, consequently whenever the tubing is drawn from a well, it is the cause of great injury to it, as the studing box being then necessarily opened, the air isomediately rulate back between the tubing and casing into the well, going into the oil rock and gas venus, and consequently clusting the oil and gas to rush back to a great distance. It almost always takes several days after pum ing is resumed for a well to be brought back to its former condition, and offentimes it takes several weeks, and quite frequently wells have been almer condition, and oftentimes it takes several weeks, and quite frequently wells have been almost completely rained by the sir being thus let in while drawing tubing. The Back Suction Preventive is attached to the stuffing box, and works in such a way that it compitely shuts up the space between the s'uffing box and tubing so effectually that not a paticle of air can get through at my time while the tubing is being drawn and replaced. It supples a want long felt and is without question ore of the most valuable inventors of the day to those engaged in the oil producing business. No well should be without one, and oftentimes caves ten times its cost by once using.

It is manufactured and for sale at the Foundry and Lemons, Machine Shop of ANDREWS & CO.,
